Business Continuity Planning/Disaster Recovery

Business Continuity Planning is a coordinated activity to enable the recovery of IT/business systems due to a catastrophic event or serious disruption caused to a business by events such as fire, flood or theft of vital computer equipment. Disaster Recovery is achieved by restoring IT/business operations at an alternate location or recovering IT/business operations using alternate equipment within a reasonable timeframe for members, customers or staff of business.

Why do I need a Disaster Recovery Service?

Disaster recovery is now a business essential and is nothing more than due diligence. Sound business continuity and data recovery plans ensure that a company's most important information remains accessible, accurate and secure, even when the unexpected occurs. The management of the organization have a responsibility to recover from such incidents in the minimum amount of time, with minimum disruption to members, customers & staff and at minimum cost. Infinity IT provide a robust Disaster Recovery Service to Credit Unions of various sizes throughout Ireland.

About Roankabin

RoanKabin is Ireland's leading manufacturer of modular, off-site & portable building solutions.

Through our extensive knowledge acquired over thirty years, RoanKabin has expertise and experience in a wide range of sectors including Education, Health, Construction, Sports/Leisure, Industry & Commerce.

This acumen ensures we can design and develop buildings from scratch or liaise directly with a client or architect to meet their specific requirements.

We have one of the largest hire fleets in Ireland, with a wide range of units including our Galvanised Steel Frame Modular Buildings, Jackleg Kabins, RoanGuard Anti Vandal units, Containex, Containers & Toilets. Both the head-office in Kill, Co. Kildare and our Waterford office boast an extensive selection of stock units ready for immediately delivery.

Our 5 acre campus situated just off the N7/Naas Road (Junction 6) at Kill, Co. Kildare is home to our head office & factory. This state-of-the-art manufacturing facility, totalling 60,000 sq ft is equipped with the latest production machinery including automatic press, gantry cranes, CAD facilities and weld /fabrication shop.

All our buildings are manufactured in this controlled environment to precise standards which are checked meticulously by our quality control officers.
